

HORIZON® construction enhancements

Providing the ability to reliably install trays with the vessel in the horizontal position.

Balancing the risk and costs associated with tray installation.

There is a better way. You can choose Low Risk and Low Cost. You can Win-Win. The decision is clear. Choose Koch-Glitsch and HORIZON technology to provide solutions before shop-installed conventionally designed trays become problems.

KOCH-GLITSCH

Eliminates your risk

The HORIZON technology starts with a mechanical construction developed specifically for in-shop tray installation with the vessel in the horizontal position. The patented FLEXILOCK® tray construction from Koch-Glitsch is the primary building block of the HORIZON technology. If you plan to shop-install trays, then you need the insurance provided by the HORIZON technology.

| | |
|---|---|
| Special Mechanical Design | Prevents the problems that occur when conventionally designed trays are installed in horizontal columns, including inefficient installation sequencing, part deforming/breaking, panel shifting, joint dislodging, extra field inspecting, and field readjusting of tray parts. |
| Installation Cost Savings | In the shop versus in the field. |
| Work Around Conventional Time and/or Space Constraints | Short turnaround schedules, off-shore platform utilizations and no manhole constraints during installation. |

Worldwide Headquarters

Koch-Glitsch, LP

4111 East 37th Street North | Wichita, KS 67220 – United States | tel: (316) 828-5110 | fax: (316) 828-7985

Europe

Koch-Glitsch Italia S.r.l.
